

## REMARKS

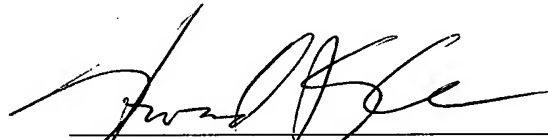

This preliminary amendment is submitted to bring the International application into compliance with US rules and practice. Specifically, the specification has been amended to correct several typographical errors and informalities, and to provide the necessary headings in the specification. In addition, the claims have been amended to provide a new set of claims (claims 12-27) that conform to US rules and practice by, e.g., avoiding improper multiple dependencies and providing, in several instances, a proper Markush format. No narrowing amendments are intended, and it is believed that new claims 12-27 surrender no scope compared to the scope of original claims 1-11, now cancelled. A new Abstract has been provided that is in compliance with US rules.

No new matter has been added by any of the amendments submitted hereinabove.

An expeditious examination on the merits is respectfully requested.

Respectfully submitted,

Date: July 9, 2004
